DS

EXPERIENCE

Lead Product Designer

KlimaShift

09/2023 - Present Gurugram, Haryana

- Spearheaded design of AI-Powered Energy Analysis Dashboard serving 500+ small building owners, enabling real-time energy consumption monitoring and data-driven sustainability decisions across multiple assets
- Designed and shipped AR-integrated mobile applications for asset onboarding, reducing client onboarding time by 40% and streamlining operations for field teams
- Led complete redesign of Admin Dashboard, improving administrator workflow efficiency and enabling seamless access to client data for 50+ internal users
- Drove design strategy and product vision in collaboration with CEO, CTO, and cross-functional teams including development, sales, marketing, and data analytics
- Established design system and component library, ensuring consistency across 5+ product touchpoints and accelerating development cycles by 30%
- Mentored 3 junior designers and coordinated with 10+ developers, fostering collaborative culture and maintaining design quality standards

UI/UX Designer

Quantmhill - IT Services & Consultancy

04/2023 - 09/2023 Noida, Uttar Pradesh

- Designed enterprise software interfaces for IT consulting clients, focusing on intuitive navigation and task completion efficiency
- Conducted user research and usability testing sessions, translating insights into actionable design improvements

UI/UX Designer

Learnphi Technology

09/2022 - 03/2023 Ahmedabad, Gujarat

- Designed gamified learning platform for enterprise client, increasing employee engagement by 60% and course completion rates by 35%
- Created Learning Management System (LMS) with modern UI patterns and seamless user flows, serving 1,000+ students
- Implemented interactive design elements and reward systems that enhanced learning effectiveness and user satisfaction

Freelance Designer

Self-Employed

05/2020 - Present Noida, Uttar Pradesh

- Delivered full-scale branding strategy for Trivira Global Enterprise including responsive e-commerce website, product packaging, social media campaigns, and marketing collateral
- Designed SEO-optimized product websites with focus on conversion optimization, user engagement, and brand consistency
- Created sustainable packaging solutions using eco-friendly materials while maintaining strong shelf appeal and brand recognition
- Developed targeted social media strategies and visual content that increased client engagement rates by 45%

SUMMARY

I'm a Product Designer with strong experience owning end-to-end design for complex, data-driven products. Most recently, I led UX for an AI-powered energy monitoring platform, working across research, interaction design, data visualisation, and system scalability. I'm comfortable operating in ambiguous problem spaces, collaborating closely with product, engineering, and leadership teams, and grounding design decisions in evidence rather than assumptions. I'm particularly interested in projects where UX influences product strategy, not just execution, and where design quality directly impacts user decisions and business outcomes

KEY ACHIEVEMENTS

Streamlined Client Experience

Reduced client onboarding time by 40% for AR-integrated applications.

Enhanced Admin Efficiency

Improved administrator workflow efficiency for 50+ users with dashboard redesign.

Boosted Online Presence

Increased client engagement rates by 45% through targeted social media strategies.

Expanded Learning Access

Created LMS serving 1,000+ students, enhancing education access.

EDUCATION

Master of Design (M.Des) in UX Design

DIT University

2025 - 2027 Dehradun, India

- Currently Pursuing

Bachelor of Design (B.Des) in Industrial and Product Design

Uttar Pradesh Institute of Design

2018 - 2022 Noida, India
