PROFESSIONAL SUMMARY

Product designer with 3+ years of experience designing digital products, dashboards, and data-driven experiences that solve real problems. Led enterprise SaaS design at KlimaShift (backed by Schneider Electric & Shell Petroleum), delivering an AI energy-intelligence platform that achieved ₹2,03,786 verified cost savings, 26t CO₂e carbon offset, and a 40% reduction in HVAC drift errors. Combines UX strategy, systems thinking, and AI-ready design to create measurable business impact.

WORK EXPERIENCE

Lead UX Designer

KlimaShift — AI Energy Intelligence (Enterprise SaaS) | Sep 2023 - Present | Gurugram

- Architected an AI-driven IoT telemetry dashboard for multi-site food retailers across 45 buildings and 200 assets, moving facilities from reactive firefighting to proactive optimization.
- Designed a 7-module navigation system and AI-ranked diagnostics (Avrio Advisor) that mitigates alarm fatigue through a structured data hierarchy.
- Shipped a Savings analytics module tying optimization actions to financial outcomes — key to client retention and upselling (₹2,30,345 APFC savings, 0.98 power factor).

UI/UX Designer

Quantumhill IT Service & Consultancy | Apr 2023 - Sep 2023 | India

- Delivered UX and UI design for client web and mobile products; standardized design handoff through documented design systems.

UI/UX Designer

Learniphi Technology Pvt. Ltd. | Sep 2022 - Mar 2023 | India

- Designed end-to-end SaaS product flows, from research and wireframes to high-fidelity prototypes; usability sessions informed navigation restructures.

Freelance Product & Brand Designer

Independent — incl. Trivira Global Enterprise | Aug 2020 - Present | Remote

- Built Trivira's brand identity, website UX and product design system — a trust-led e-commerce ecosystem that grew to ₹64 Lakh revenue and 100,000+ customers in 12 months.
- Conducted UPI fintech field research with small-business women users; delivered an inclusive scan-first payment concept built on clarity-over-features principles.
